

You people have lost your minds. Don't you realize the hundreds of people that would be unemployed if there were no telemarketing firms. I do not support any ban of such calls. I do not support your amendment. In the area that I live there are 2 telemarketing firms that employ in excess of 500 people and you people basically want to put this many people on public assistance.

Note to the FCC: Let the telemarketers alone. They are just doing a job and making money to support themselves and their families.

Put some time restrictions but that's it.

Yours;

Wayne Miles
